

# Making a Change. Together.

APS thanks the following Arizona businesses for taking action to improve their energy efficiency. In partnership with the APS Solutions for Business program, these businesses will save enough energy to power more than **58,000 Arizona homes for a year!** And, while these businesses are saving money on their energy bills, they are also improving the environment for the rest of us. The energy they save will reduce carbon dioxide emissions by **732 million tons** and save nearly **186 million gallons of water.**

Thank you for working with us to ensure that a better tomorrow starts today.
